

LIGHT-GRADE SOIL STABILISATION AND GRASS ESTABLISHMENT MAT

JUTE BIODEGRADABLE EROSION CONTROL MAT (FINE)

100%

**organic and
biodegradable
fibres**

**Promotes
plant
growth**

**Can withstand
water flow
up to**

**1.3
seconds**

Jute Mat Fine is a light-grade biodegradable erosion control mat made from 100% natural jute fibres. It effectively acts as a blanket, protecting topsoil and seed from water and wind erosion while promoting a moist micro-climate for seed germination.

BENEFITS OF JUTE MAT FINE

- Provides an ideal environment for seed germination by retaining moisture at the soil surface
- Protects the soil from erosion while allowing seeds to establish and grow through the mat
- Suitable for use in conditions with water velocities reaching up to 1.3 metres per second
- Acts as a roll-on mulch, adding organic matter to the soil as it breaks down
- Acts as a protective blanket, preventing seed loss from wind, water, and bird activity
- Ideal for revegetation and can be used to suppress weeds
- Made from 100% natural, organic fibres that biodegrade within approximately 6 months, without posing an entanglement risk to wildlife
- Reduces heat absorption to help protect plants
- Flexible and strong, allowing for foot traffic while being laid
- Enables easy handling and installation by one or two people

APPLICATIONS

Jute Mat Fine is a natural mat for grass establishment and erosion control, ideal for:

- Steep slopes and batters of up to 1:1 or 45 degrees
- Roadside landscaping and embankments
- Golf courses and landscaped areas
- Wetlands and riverbanks
- Coastal and environmentally sensitive areas

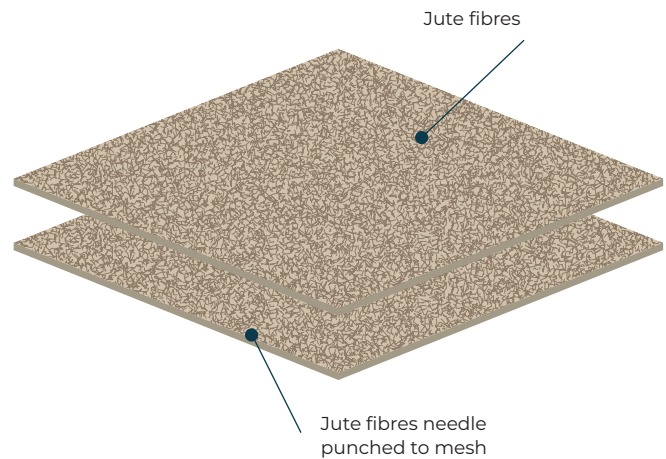

Ideal for the stabilisation of low-flow drainage lines, Jute Mat Fine helps protect topsoil and maintain surface integrity in erosion-prone areas.

JUTE MAT FINE RANGE

Code	Roll Size	m ²
JUTEL-183025	1.83m x 25m	45.75

A range of jute pins are also available from Geofabrics
